Dear Ron:

I have attached a brochure and letter which explains Reubens Blue Grass. From what I've been able to learn, this is a very durable grass, and has been successfully used in a great variety of climates and conditions. You may want to develop your experimental data on this variety. Should you need a test plot area, this may be available from Interpace at their property west of Lehi. Think about it and let me know.

If I can be of any further assistance, please let me know.

Sincerely yours,

Dale E. Hirschfeld  
Northwest Area  
Mining/Geologist

Thank you for your interest  
in the FIRST AND ONLY U.S.  
CERTIFIED CANADA BLUEGRASS...  
REUBENS

In reply to your inquiry for additional information about REUBENS CANADA BLUEGRASS, I am enclosing with this letter a copy of our new full-color brochure detailing the many outstanding performance characteristics of this newly available "reclamation type" grass. As you will read, REUBENS CANADA BLUEGRASS is not recommended for lawns -- it is best suited for inclusion in mixtures or as a straight seeding on roadsides, landfills, mine spoils, right-of-ways, pipelines, earthen dams and dikes, backfill quarries, and ski slopes which are too dry or infertile for many other grasses. REUBENS is very similar to the early native prairie grass which dominated many of the Pacific Northwest prairies.

REUBENS is currently priced at \$120/cwt. F.O.B. Spokane, Washington, and we have a plentiful supply of high quality seed available. If I can be of any further help, please feel free to write or call.

Very truly yours,

JACKLIN SEED COMPANY

Philip N. LeBlanc  
RECLAMATION SEED MARKETING MANAGER
